

Carbon Reduction Plan

EDAP TMS (dba FocalTherics)

FocalTherics is committed to achieving net zero emissions by 2050.

Baseline Emissions Footprint vs Current Emissions Footprint

Baseline emissions are a record of the greenhouse gasses that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Carbon Reduction Projects

The following environmental management measures and projects are currently in progress or have been completed since the 2025 baseline.

Actions In Progress

Appoint a sustainability champion

Target Completion Date: 31/12/2027

Objective

To strengthen sustainability governance by assigning responsibility for coordinating and promoting sustainability initiatives across the organisation.

Target

A sustainability champion is appointed and supports the implementation and monitoring of sustainability actions.

Action, Improvement or Control

A sustainability champion will be nominated to coordinate sustainability activities, encourage engagement and act as a central point of contact for sustainability-related matters.

Expand carbon data collection in preparation for evolving reporting requirements

Target Completion Date: 31/12/2027

Objective

To establish global emissions data collection processes that support readiness for expanded carbon reporting requirements, including PPN 006 and NHS expectations.

Target

Improve the completeness and quality of global Scope 1, Scope 2 and Scope 3 emissions data across the organisation and its supply chain.

Action, Improvement or Control

Establish processes for collecting global Scope 1, Scope 2 and all categories for Scope 3 emissions data, identifying gaps in current information and engaging suppliers and stakeholders to improve data availability in preparation for future reporting requirements.

Collaborating with upstream and downstream logistics partners to reduce transport emissions

Target Completion Date: 31/12/2027

Objective

To reduce emissions from inbound and outbound distribution by working with logistics partners to improve transport efficiency and support lower-carbon delivery operations.

Target

Establish regular engagement with upstream and downstream logistics partners to encourage measures that reduce transport emissions and improve environmental performance.

Action, Improvement or Control

The organisation will encourage logistics partners to adopt efficient transport practices, route optimisation and lower-carbon delivery solutions where feasible.
